	Time (sec)	Warnings	Reachable Blocks (average %)	Reached Max Steps	Functions Analyzed as Root
sqlite					
No IPA	204	25	85	82	1546
Default Inlining	844	69	59	326	649
Replay without inlining	831	74	59	324	647
Inline all	1628	94	69	666	1530
max nodes 10X	7816	86	62	270	638
cyclom <=10	780	67	63	333	783

Default Inlining: inlining with no heuristics; right after it was turned on in 2012

Inline all: analyze all functions as roots ~ "-analyzer-inlining-mode=all" option

Replay without inlining: if we reached max BB count in an inlined function, do not retry the call site with no inlining - "-analyzer-disable-retry-exhauste

max nodes X10: increase the time out by 10x

cyclom <=10: only inline functions whose cyclomatic complexity is <10 (rough estimate of cyclom. complexity)
